BEST PRACTICES FOR A HEALTHY WORK ENVIRONMENT

The Arthur Jackson Company has introduced a new piece of technology to our arsenal to help fight confirmed COVID-19 cases:

Electrostatic technology enables superior coverage of trusted Clorox solutions in hard-to-reach places. This includes the side, underside and backside of surfaces, killing 99.9% of bacteria in 5 seconds. It's a one-step disinfectant tool that eliminates odors, sanitizes soft surfaces, and inhibits the growth of mold and mildew for up to 7 days. It is a low odor, no fragrance product. This highly effective tool was introduced to combat COVID-19 in response to positive cases in the building as well as special request deep cleaning of tenant spaces.

The Clorox Total 360 Sprayer will be used for the following:

- Reported COVID-19 cases
- All restrooms
- High touch points

The solution used in the sprayer has proven to effectively perform the following:

- Kills 99.9% of bacteria in 5 seconds
- Kills 44 organisms : Kills cold and flu viruses, MRSA and norovirus in 2 minutes or less
- One-step disinfecting
- Eliminates odors
- Sanitizes soft surfaces
- Inhibits the growth of mold and mildew for up to 7 days

We are committed to providing a safe and healthy building community at ONE Liberty Place.
